

Assignment

Database Technologies

Diploma in Advance Computing (PG-DAC)

Basic Programming

1. Write a basic PL/SQL programme to create two variables and store some default value and print them.

```
DROP PROCEDURE IF EXISTS a;
DELIMITER $
CREATE PROCEDURE A()
DETERMINISTIC
BEGIN
    declare x int default 100;
    declare y varchar(20) default "ABC";

    select CONCAT(x, " ", y);
END $
DELIMITER ;
```

-
2. Write a simple procedure to print 'Hello World'

```
DROP PROCEDURE IF EXISTS hello;
DELIMITER $
CREATE PROCEDURE hello()
BEGIN
    select "Hello World";
END $
DELIMITER ;
```

-
3. Write a simple procedure to print a table of a given number?

```
DROP PROCEDURE IF EXISTS ntable;
DELIMITER $

CREATE PROCEDURE ntable(n int)
BEGIN
    DECLARE i int DEFAULT 1;

    myloop : LOOP
        IF i > 10 THEN
            LEAVE myloop;
        END IF;

        SELECT n*i;
        SET i=i+1;

    END LOOP;
```

```
END $  
DELIMITER ;
```

4. Write a procedure to print the maximum number of 3 inputted numbers.

```
DROP PROCEDURE IF EXISTS max_no;  
DELIMITER $  
CREATE PROCEDURE max_no(a int, b int, c int)  
BEGIN  
    DECLARE max_val int;  
  
    IF a>b AND a>c THEN  
        SET max_val = a;  
  
    ELSEIF b>c AND b>a THEN  
        SET max_val = b;  
  
    ELSE  
        SET max_val = c;  
  
    END IF ;  
  
    SELECT max_val AS Maximum_Number ;  
  
END $  
DELIMITER ;
```
